Educated In America and New Delighting London Andiences. It cannot be said of the horse, as Heine raid of the menkey, that it does not talk for fear of being put to week. Probably the ultimate degree to which the training of animals may be carried is reached in the case of the talking horse that literally made its bow to the public recently at the Crystal palace. Maceppa is in Arab, educated, so to say, in America, and its extraordinary capacity for learning was manifested before an astonished and enclusiastic audience. In the strict meaning of the word, the horse does not talk, but is capable of answering questions addressed to it. It even understands french or German when it hears it spoken, though it does not suggested that he most smeak these laws to say.
